CKD Research Prediction Report

Project: Privacy-Preserving Federated Learning Framework for Multi-Hospital Medical Data Analysis

Patient ID: TEST-PATIENT-001
Simulated hospital: 1
Report generated: 2026-10-22 07:18:01

Entered patient features

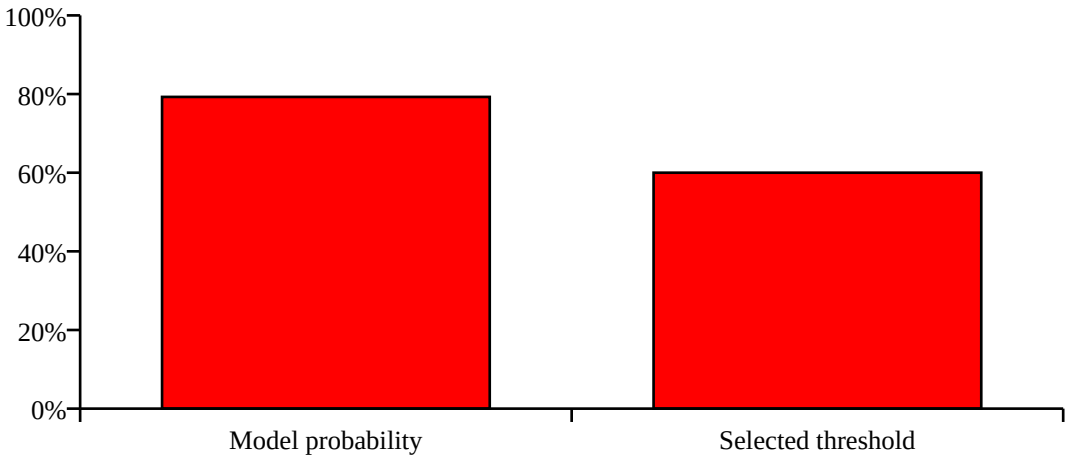
Feature	Value
age	48
al	0
appet	1
ba	0
bgr	121
bp	80
bu	36
hemo	15
pc	1
pcc	0
pcv	44
pot	4.5
rbc	1
rbcc	5.2
sc	1.2
sg	1.02
sod	138
su	0
wbcc	8000

Model result

Result: CKD risk signal
Model probability: 0.7927

Patient-specific prediction graph

This chart compares the model output probability with the selected research threshold. It is not a clinical diagnostic scale.



Research demonstration only. This report is not a medical diagnosis. Do not use this result alone for clinical decisions. The model and preprocessing compatibility must be validated before interpreting predictions.
